### Document Purpose and Audience

- **What is this document about ?**
  - This document is about software design specification that show how to do the system .
- **What is the purpose of this document ?**
  - It's aim is to fill the gap between system requirements and developers.
- **Who are Audience?**
  - Audience of this document can be Developers , Project Manager , CEO.

# CS251: Phase 2 - Fantastic 3

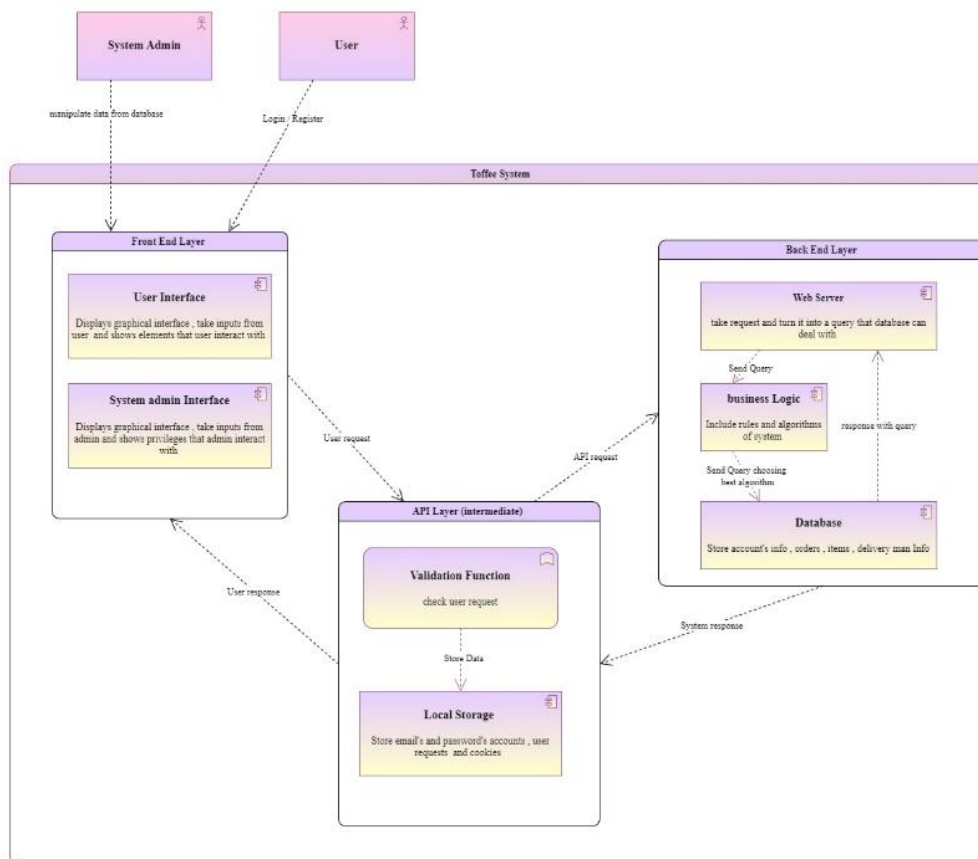

## Project: TOFFEE

### Software Design Specification

#### System Models

##### I. Architecture Diagram

- We choose Layered Architecture to apply the system architecture because we thought that it is more suitable for our system which includes layers communicating with each other.

# CS251: Phase 2 - Fantastic 3

## Project: TOFFEE

## Software Design Specification

### III. Class Descriptions

Class ID	Class Name	Description & Responsibility
1.	System_admin	User management: system admin manages or suspends or delete account. System management: manipulate database. Can view statistics.
2.	General_user	Can View items in the catalog – can register (create object of account) or login (if he/she has account) to the system.
3.	LoggedIn_user	Can select items from catalog – can view cart – can check out the cart to place an order – can rate the items after ordering it – can view history of orders that he/she placed.
4.	Item	Can view the item information.
5.	payment	LoggedIn_user can choose any payment method (cash - smart wallet – loyalty points - vouchers) he/she likes.
6.	order	Can be placed or reordered by LoggedIn_user – its information can be displayed and stored it in the database.
7.	tracking	Check if the order is delivered or not.
8.	delivery	Set delivery info and stored it in the database and get it.
9.	Account	Create an account or find an account and store it in the database.
10.	interface	Interact with users.
11.	database	Store all information needed in the program.
12.	category	Store all categories in data base and set, get categories through it .

### Class - Sequence Usage Table

Sequence Diagram	Classes Used	All Methods Used
1. Register Scenario	1. Interface	<ul style="list-style-type: none"> <li>Select_User()</li> <li>User_menu()</li> </ul>
	2. General_User	<ul style="list-style-type: none"> <li>Register()</li> </ul>
	3. LoogelN_User	<ul style="list-style-type: none"> <li>View_catalog()</li> <li>View_Categories()</li> <li>Select_category()</li> </ul>
	4. Account	<ul style="list-style-type: none"> <li>Create_account(email, password ,number, name, address)</li> </ul>
	5. Database	<ul style="list-style-type: none"> <li>Add_account(account)</li> </ul>
2. login Scenario	1. Interface	<ul style="list-style-type: none"> <li>Select_User()</li> <li>User_menu()</li> </ul>
	2. General_User	<ul style="list-style-type: none"> <li>Login()</li> </ul>
	3. LoogelN_User	<ul style="list-style-type: none"> <li>View_catalog()</li> <li>View_Categories()</li> <li>Select_category()</li> </ul>
	4. Account	<ul style="list-style-type: none"> <li>Find_Account(email, password)</li> </ul>
	5. Database	<ul style="list-style-type: none"> <li>get_account(email)</li> </ul>
3. add new item Scenario	1. interface	<ul style="list-style-type: none"> <li>Select_User()</li> <li>System_admin_menu()</li> </ul>
	2. General_User	<ul style="list-style-type: none"> <li>Login()</li> </ul>
	3. System_admin	<ul style="list-style-type: none"> <li>Add_new_item()</li> </ul>
	4. item	<ul style="list-style-type: none"> <li>add_itemm_info()</li> <li>save_item()</li> </ul>
	5. database	<ul style="list-style-type: none"> <li>add_item(item)</li> </ul>
